SIPARILA PASSION FOR WOOD

DESIGN® FROM FINLAND

Wood has always been in the heart of Finnish culture. It has been used for building and heating homes, and even for producing clothing and food. Wood has played a significant role in the lives and homes of Finns - and continues to do so.

Finnish craftsmanship, top design and respect for nature all come together in Siparila's interior products, which can be used for creating impressive overall designs or exciting elements for the home. We believe the spirit of the home comes from the heart, as every home reflects its occupants' lives and personalities. We are prepared to do our utmost to make your home look just like you - now and forever.

Welcome to the world of Siparila. Let wood inspire you and create your greatest ideas!

Juha Sojakka, CEO

Wood is a versatile material for decoration *and the only renewable* construction material.

This tradition lives on in Siparila, which produces wood-siding design solutions whose primary purpose is to bring warmth and beauty into the home with the help of Finnish designers. Wood is inspirational and alluring. The versatility of wood allows for creativity and new interior design ideas.

The AITO cladding is available in a 280 mm width. The panels are end matched and come with a concealed fixing system. The finished surfaces are completely smooth and nail free and the joint are easy to complete.

Please note that the surfaces may feature an occasional resin pocket or knots. This is due to the drying process and depends on the level of humidity present.

AITO BOLD AND BROAD INTERIOR CLADDING

Bring a sense of smooth serenity to your walls with our AITO interior cladding. The white finish will add a sense of space while the grey creates a sense of calm. In AITO, we have allowed the grain of the wood to show through, while the narrow open joint allows for a smooth and natural finish. The cladding is quick and easy to install, making it the ideal way to create stylish finishes.

KIILLE LET THE LIGHT IN

5

White

The classic KIILLE panelling brings a sense of balance to your interiors. The smooth, white surfaces reflect the light, bringing a sense of brightness and spaciousness to your home. The panels come with a concealed fixing, meaning that the end result will be flawless and nail free.

Create a calm and muted palette for your home with the translucent grey RAILO, or opt for the classic opaque white to add a sense of space to your interiors.

White

Translucent grey

The RAILO panels are easy to install, and the concealed fixing system guarantees a flawless

-

You can use the RAILO panelling in bathrooms, provided they are installed with mechanical ventilation.

RAILO FOR THE LOVE OF SLATS

RAILO creates a fresh and airy slatted look. Subtle yet distinct, the narrow grooves give the panelling a relaxed and rhythmical quality. RAILO lends itself to a number of styles and is the ideal choice for both contemporary and classic spaces. The opaque white and translucent grey deliver a versatile backdrop you can use to create the look you want.

finish every time.

sand

White Translucent black

The STRUKTUURI panels have been treated to withstand humidity. With a concealed fixing system and end matching, they are also ideal for washroom ceilings. Don't forget to treat any trimmed edges to prevent cracking due to moisture.

STRUKTUURI 176 mm wide panels can be used also in sauna.

CAN BE USE

Pearly grey

Pearly brown

STRUKTUURI INNOVATIVE AND BOLD

The STRUKTUURI panels allow the wood's natural character to show through.

The panels are available in five different colours designed to cater for all tastes and styles. Opt for something darker to add a sense of depth to your interiors or try the iridescent grey for something light with a unique charm. The translucent sand and lightly iridescent brown invite you to play with warmer tones. We have added the fresh and bright white to complement the choice of natural tones. The special surface treatment highlights the natural and unique variation on the wood's surface.

Translucent

Statt N

Your home should have a unique and authentic feel. The real wood in our panelling matches the rhythm of your life, absorbing and then releasing moisture into the air. Wood is known to improve indoor air quality.

Product	Thickness, mm			Open joint, mm			
STS	15	176	2350	6	White, translucent sand, translucent black, pearly grey, pearly brown	6,21	161

The VALO panelling has been designed for use on ceilings. The design gives a slatted effect but is quick to install thanks to the finished edges. The panels are quick to slot together and, unlike with traditional slatted finishes, you won't need to worry about ensuring that the surface behind them flawless.

If you intend to use the panels to cover larger surfaces, please design the joints carefully as the VALO panels are not end matched.

VALO CREATE A SENSE OF FLOW

Our VALO panelling is perfect for adding a sense of flow to your home and allows you to light your interiors in a completely new way. With VALO, you can add sleek and unobtrusive LED strip lights between the panels to create a range of effects that mean you no longer need separate light fixtures for your home. You are free to choose the amount of light you want for your interiors.

For impactful yet understated interiors. Modern and minimalist, the KOO has been created to transcend trends and time.

The KOO panels celebrate the beauty of wood and are available in a thickness of 21 mm.

Reflecting the ambitious approach people have come to expect of Finnish design, they have been thoughtfully and imaginatively crafted by interior architect Kari Lappalainen.

KOO translucent grey

KOO SOLID WOOD - FOR A LASTING IMPRESSION

Our KOO interior panelling uses the beauty of solid wood to make time itself stand still. The carefullycrafted design brings together three different elements to form a single harmonious finish. Responding flexibly to your ideas, the panels can be used on their own or in combination to create the look you want. The KOO panels give a different and unique result every time.

*Please check the length available when placing your order. The KOO panelling is not end matched, and will require trimming before installation.

TIMELESS

DESIGN

Use PALA panels to create a statement herringbone pattern bedstead in your home.

The PALA panelling is installed using Siparila Fix glue, no nails or hammering required. The PALA panelling must be installed on a plywood, stone, concrete or clean plastered surface, please do not use fillers.

To create a square or herringbone pattern, you will need both right, and left handed panels.

Translucent birch

Please note that for the thermal birch there may be some colour variation between batches.

You can even use the splash-proof PALA panels to decorate your bathroom. However, please note that they cannot be used in saunas.

PALA YOUR INTERIORS FALLING

INTO PLACE, PIECE BY PIECE

Use the PALA panels to create your own interior features. The lightweight panelling is easy to install and can be used to create geometrical designs, herringbone patterns or classic subway tile looks. Thanks to the handy, user-friendly sizing, our PALA panels also lend themselves for use in smaller spaces. The materials are light and easy to transport. The panelling is available in 505 mm and 1005 mm lengths.

STS	13	95	2350	3	White	12,22	82	

KASTE SPLASH-PROOF SURFACES

The KASTE panels draw their inspiration from the brilliant freshness of a summer morning. The panelling adds a clear and stylish look to all your wet spaces. With a seamless and continuous look, the panelling can be extended to other areas of your house too.

WET SPACES

The heat of the sauna leaves bathers feeling refreshed and relaxed. Thanks to its low heat conductivity, aspen is the perfect sauna cladding material as it will leave the surfaces *pleasant to the touch.*

The flush finish and hidden fixings mean that you can enjoy your sauna with a flawless, nail-free look. The smooth surfaces and open joints create a finish that's both stylish and beautiful. There may be significant variation in the patterns, which is due to aspen's natural growth patterns.

Translucent white

Mounted vertically, the HAAPA panels add a wonderful sense of Scandinavian hygge to your home, and will make an eyecatching feature in any area from your hallway to your sitting room.

HAAPA SAUNA PANELLING AUTHENTIC, UNIQUE, CHARACTERFUL - SURROUND YOURSELF WITH WARMTH

The subtle grain pattern found in aspen has been shaped over decades, giving a lovely sheen to the finish. Siparila's HAAPA panels offer something new and different for your sauna interiors. Available in translucent white, black and grey, the panels add a wonderful sense of atmosphere to your sauna.

The HAAPA panels have hidden fixings, which means that you won't have any visible nail marks in your sauna. The panels are easy to install and are designed to prevent water from seeping in through the nail heads and damaging the structure of the wood. For horizontal panelling, the installation is carried out from bottom up to allow the fixings to be connected to the tongue portion. Don't forget to treat any trimmed edges to prevent cracking due to moisture.

The HAAPA panelling is not end matched, and will require trimming before installation.

White

Pearly grey

The STRUKTUURI panels have been treated to withstand the significant variations in temperature and humidity. The concealed nailing means that water cannot enter through the nailheads and damage the wood. Don't forget to treat any trimmed edges to prevent cracking due to moisture.

When it comes to choosing the colour scheme for your sauna, you can now maintain a sense of continuity with the rest of your home. Choose the look you want from black accents to fresh white surfaces. The STRUKTUURI panels can be used to decorate any room in your home.

STRUKTUURI SAUNA PANELLING FOR COSY AND LIVELY INTERIORS

Create a stylish and understated look for your sauna with our STRUKTUURI panelling. The wide panels are easy to install. Choose from five different styles to create the mood you are looking for. Whether you opt for the fresh and clean white, the cosy darkness of the smoke sauna, the mystical calm of the pearl grey, the stunning irridescent brown or the understated sand, you can give your sauna the unique look you want

INTERIOR MOULDINGS

From the Siparila's interior moulding collection, you will find dozens of options to create charming and thoughtful details for your home. Highlight your home frames in style and choose natural wood. Give your creativity the power, only your imagination is the limit. KINOS, KUMPU, VANA and VIIVA collections are multi-purpose mouldings which can be used both as a baseboard and coverboard.

KIILLE

KIILLE interior mouldings are straight edged and minimalistic in design. KIILLE interior mouldings fit into space when you want a light finish. KIILLE collection has separate baseboards and coverboards.

VANA

VANA interior moulding's design can soften the modern decoration or soothe romantic décor. VANA mouldings can be used both as a baseboard and coverboard.

KUMPU

Round shapes flow on the top of KUMPU mouldings. KUMPU mouldings create charming softness to the interior details. KUMPU mouldings can be used both as a baseboard and coverboard.

H a: fc rr s: ir

KINOS

KINOS interior mouldings are plentiful in shape and can be found in up to 120 mm wide. With KINOS mouldings you can decorate your home from floor to ceiling. KINOS mouldings can be used both as a baseboard and coverboard.

VIIVA

VIIVA interior mouldings complete the decoration with simplistic, but massive design. The shape of the mouldings brings elegance to space. VIIVA mouldings can be used both as a baseboard and coverboard.

AITO

AITO baseboards adhere to parquet floor tones. Translucent surfacing of the mouldings let the real wood to be seen on the surface and delimiting the floor naturally.

HARDWOOD

Hardwood mouldings are made of ash. The design of the mouldings follow the straight lines of the KIILLE mouldings. Please note that there is separate baseboard and coverboard in hardwood selection.
